Step 1. The number of minutes of telephone calls by local fixed line → local fixed line calls = the use of local fixed line = local fixed line use

Unit: billion minutes

by category

step 2.

- 1) Local fixed line
- 2) The other two categories

- 1) Local fixed line
- 2) National and international fixed line
- 3) Mobiles

- 1) Fixed lines
- 2) Mobile

Step 3

Step 4. Key features (起点、变化、幅度、极值点、转折点、终点、最大/最小、超过)

Drop back to the 1995 figure

Local fixed line calls were the highest. = local fixed line was the most popular

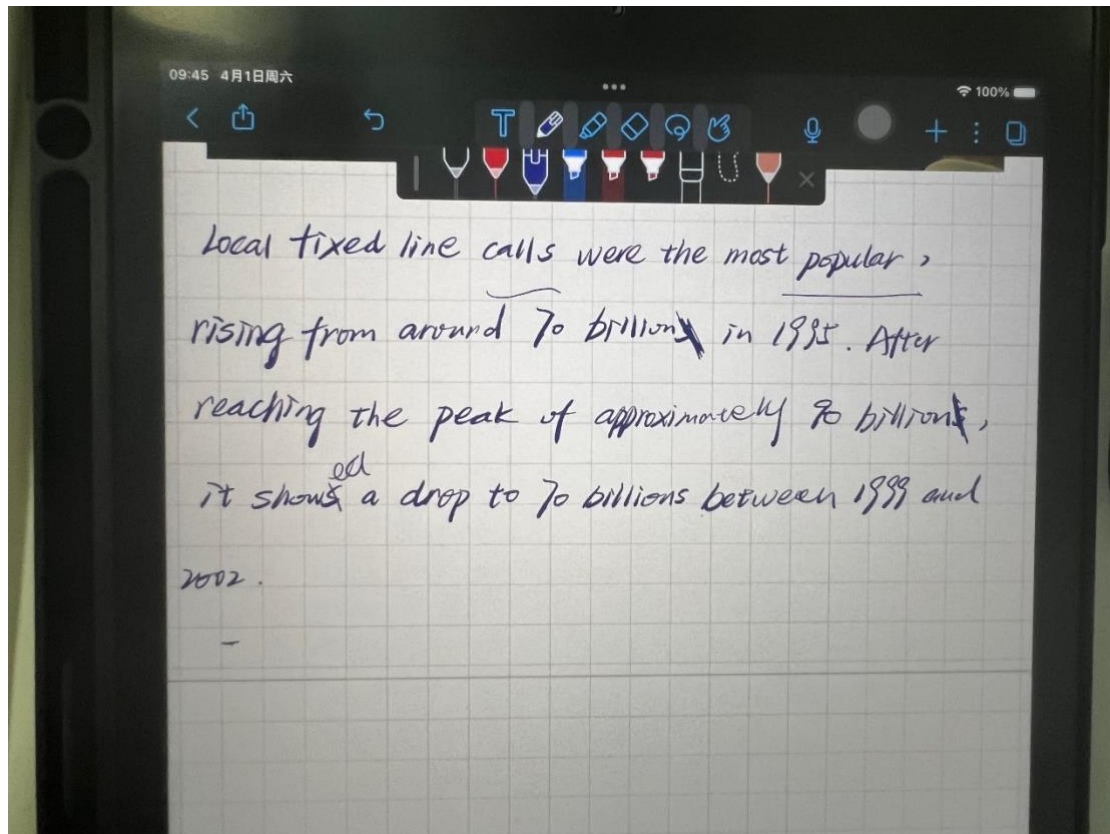

Rose more slowly (slow) → the rise slowed (vs. quickened)

Increase exponentially

Step 5. Overview

动态：变化规律、间距变大/变小（柱状图）

静态：最大/最小、偏大/偏小、起点/终点区间/数值

- 1) Local fixed line was the most popular, ~~which~~. **Its calls** rose from 70 billion minutes to nearly 90 billion minutes between 1995 and 1998. After reaching the peak (90 billion minutes) in 1999, **the calls** dropped back to the 1995 figure in 2002. 时间段—段变化; 时间点-数值

~~Starting at 70 billion minutes, local fixed line calls rose to the peak of 90 billion minutes in 1999.~~

- 2) Local fixed line calls were the highest, which increased/rising from 70 billion minutes to nearly 90 billion minutes between 1995 and 1998. After reaching the peak (90 billion minutes) in 1999, **the calls** dropped back to the 1995 figure in 2002.

- Mobile calls increased slightly from 2-over 10 billion minutes in the first 5 years before rising more dramatically to 40 billion minutes in 2002, **although this category remained the least popular./,despite remaining the lowest./, albeit with the lowest popularity.**
